**Subject:** RE: Restaking of EM areas

Curt,

Please markup the drawing as to what you believe the locations of the limits, white flags should be and we can transfer into the field with flags/stakes to make sure we are covering all areas of concern. If we cannot get them located tomorrow then hope fully the surveyor comes through early next week and we can work from there.

Thanks TJK

**Subject:** Re: Restaking of EM areas

Thanks Tom.

At some point, hopefully sooner than later, CDPHE would like to see the field-staked limits plotted on the EM contour maps. CDPHE would also like to see the EM survey lines plotted on the aerial photo maps. In the Phase 2B area, I think the white-lined boundary on the attached map, represents the current white-flagged staked area in the field; however, the white-lined boundary on the attached map in the Phase 2B area doesn't correspond well to the EM contours and EM anomalies. I can't make it to the site tomorrow, but I plan to get out there over the weekend to see Jeremy's staking.

Thanks again,  
Curt

Everyone,

Jeremy from NGPR will be on site around 11 am to reflag the EM areas and verify the limits of the drum areas tomorrow. I hope to have the surveyor on site by Monday to confirm. I will be on site around 10:30 am to coordinate. Please let me know if you have any questions. Layout will be based on the attached.

Thanks TJK
